\* Regonline will not filter by individual "agenda" items -- how many vegetarians, t-shirts sizes etc. Also will not include those fields on nametags. You have to export and manipulate data.

\* Regonline will, however, create "smartlinks" which are password-protected individual reports.

\*\* sometimes users have trouble logging in or remembering their password; reset is easy. Link is not obvious though.

\*\*\* this can be paired with a database export system
